Grading Policy

Expectations: Students are expected to learn both the mathematics covered in class and the mathematics in the textbook and other assigned reading. Completing homework is part of the learning experience. Students should review topics from prior courses as needed using old notes and books.

Homework: Approximately four hours of homework will be assigned in each lesson as well as additional review assignments over weekends.

Exams: There will be two midterm exams and a final exam.

Grades: *The precise grading policy for your section will be distributed by your instructor. There is a uniform departmental final exam that students must pass in order to pass the course.*
