

The Ethnopharmacology of Medicinal Plants for Caribbean Women's Health

Ella Vardeman

Adjunct Lecturer, Biological Sciences

Ella Vardeman's research focuses on the ethnopharmacology of plants used by Haitian immigrants in New York City for women's health. Her work contributes to a larger cultural competency program currently under development at the New York Botanical Garden that relays the results of urban ethnobotany projects in collaboration with Caribbean and Latino immigrants to medical students and physicians.

Wednesday, April 17, 2024

12:30 – 2:00 pm

In Person & Virtual

Carman Hall, Room 222
